JAMAICAN PSYCHOLOGICAL SOCIETY

Learning Management System (LMS)

PROJECT REQUIREMENTS & DEVELOPMENT PROPOSAL

JamPsych LMS

Online Courses, Workshops, Quizzes & CEU Certification Platform

PREPARED FOR	**The Jamaican Psychological Society (JamPsych)**
PREPARED BY	**Imran Alam**
VERSION	**1.0**
DATE	**September 23, 2026**
PROPOSED TIMELINE	**4 - 5 weeks**
PLATFORM	**Laravel (PHP) web application**

Confidential - prepared exclusively for JamPsych. Not for redistribution.

SECTION 1

Executive Summary

JamPsych is the professional body for approximately 240 psychologists and counsellors in Jamaica. Its members must earn **at least 18 Continuing Education Units (CEUs) every year** to maintain licensure, and JamPsych already delivers the education that makes this possible: courses, webinars, workshops, the Conversations series and recorded Learning-on-Demand sessions.

Today that education runs across several disconnected tools: the WordPress website for information, Google Forms for registration, Zoom for delivery, Ezee Payments links for fees, and email plus manual effort for post-tests and CE certificates. This works, but it does not scale, it relies on staff time, and members have no single place to see what they have completed or how many CEUs they have earned.

This document proposes the **JamPsych LMS**: one secure web platform, built on Laravel, that brings enrolment, payment, learning content, quizzes, submissions, CEU tracking and certificate issuance together under three purpose-built dashboards: **Admin**, **Uploader (Instructor)** and **Student (Member)**.

> **Approved design baseline**
>
> The clickable prototype you have already reviewed and approved (**https://jampsych.netlify.app**) is the agreed visual and navigation baseline. Development will turn those screens into a working, database-backed system.

Key outcomes

- **One login, one place** for members to enrol, learn, submit quizzes and download certificates.
- **Automatic CEU certificates** with unique, verifiable certificate IDs - no manual preparation.
- **Online payment** for courses and workshops in JMD and USD, with order records and receipts.
- **Instructors (Uploaders) self-serve**: they publish courses, workshops, quizzes and materials and review submissions.
- **Real-time reporting** for the executive: revenue, enrolments, completions and certificates issued.
- **Delivery in 4 - 5 weeks**, followed by a support and warranty period.

SECTION 2

Current Website Analysis

We reviewed the live website (https://jampsych.com) to understand how JamPsych operates today, so the LMS fits existing processes rather than replacing what already works.

Area	How it works today	Observation
Website platform	WordPress site (built by WebHead) with About, Membership, Education, Ethics, Licensure, Resources and Contact sections.	Good public information site. No member login or learning area.
Membership	5 categories: Full ($4,000 JMD), Affiliate ($2,500 JMD), International Affiliate [M] ($30 USD), International Affiliate [B] ($20 USD), Student ($1,000 JMD). Annual cycle July 1 - June 30.	Fees are both JMD and USD, so the LMS must support two currencies.
Payments	Separate Ezee Payments links per membership type.	Ezee Payments is already trusted; the LMS will integrate it for course/workshop payments.
Education	Courses, Webinars, Workshops, JamPsych Conversations, Blogs and recorded Learning-on-Demand.	Content exists but is not organised into a trackable learning path.
Registration	Google Forms; sessions delivered on Zoom.	Manual list handling; no automatic confirmation or attendance record.
Assessment & CEUs	Post-test and evaluation after a session; CEU certificate issued afterwards (e.g. 4 CEUs for JMD $6,000).	Manual marking and certificate preparation - the biggest time cost to automate.
CEU rules	18 CEUs per year for licensure; up to 100% via independent learning; teaching may count up to 4 CEUs.	Members need a running CEU total per licensure year.

Problems the LMS solves

- Members cannot see their own history of courses, results, certificates or CEU totals.
- Staff re-enter registrations from forms, reconcile payments by hand and prepare certificates one by one.
- No single report of revenue, attendance or CEUs issued for the executive or for licensure audits.
- Instructors depend on the office to publish material, collect quiz answers and return results.

SECTION 3

Project Objectives & Scope

Objectives

- Deliver a secure, mobile-friendly LMS that matches the approved prototype.
- Automate enrolment, payment confirmation, quiz submission, grading workflow and certificate issuance.
- Track CEUs per member per licensure year and make them downloadable as proof.
- Give the executive clear, exportable reports.
- Link seamlessly from the existing WordPress website without rebuilding it.

In scope (this phase)

Module	Included
Authentication	Registration, login, email verification, password reset, role-based access (Admin / Uploader / Student).
Admin Dashboard	KPIs, revenue and order charts, uploader management, student management, courses/workshops/quizzes oversight, orders, payments, certificates & CEUs, settings.
Uploader Dashboard	Content overview, add content (course, workshop, quiz, material), quiz upload (.doc/.docx), student submissions review, content status (published/draft).
Student Dashboard	Enrolled courses with progress, continue learning, quizzes (download / upload answers), submissions, certificates & CEUs, deadlines, achievements.
Courses & Workshops	Catalogue, detail pages, lessons (video embeds, documents), free or paid pricing, publish/draft, live-session (Zoom) link for workshops/webinars.
Quizzes & Submissions	Downloadable quiz documents, answer upload (PDF/DOC/DOCX/images), due dates, late flag, review & result by uploader.
CEUs & Certificates	Auto-generated PDF certificates with unique ID, CEU value per course, yearly CEU totals, public certificate verification page.
Payments & Orders	Ezee Payments integration, JMD and USD pricing, order history, receipts (PDF), refunds recorded by admin.
Notifications	Email + in-app: enrolment, payment receipt, new content, due-date reminders, results, certificate issued.
Reports	Revenue, enrolments, completions, CEUs issued, submissions - filterable and exportable to CSV/Excel.

Out of scope (can be quoted as Phase 2)

- Rebuilding or redesigning the WordPress public website (we only add links/buttons to the LMS).
- Online *membership* application and renewal inside the LMS (members continue to use the current process; the LMS can import the member list).
- Native mobile apps (iOS/Android) - the LMS is fully responsive in mobile browsers.
- Live video hosting / streaming infrastructure (Zoom or YouTube/Vimeo links are embedded).
- Automated online multiple-choice quiz engine (Phase 1 uses document-based quizzes as shown in the prototype).
- Discussion forums, chat, and multi-language support.

SECTION 4

User Roles & Permissions

The system has three logged-in roles, each with its own dashboard, plus public visitors.

Role	Who	What they can do
Super Admin / Admin	JamPsych executive and office staff	Full control: manage uploaders and students, approve and publish content, set prices and CEUs, view all orders and payments, issue or revoke certificates, configure settings, view all reports.
Uploader (Instructor)	Facilitators and presenters invited by the Admin	Create and manage their own courses, workshops, quizzes and materials (within permissions set by Admin); review submissions for their own content; see their own content statistics. Cannot see payments or other instructors' data.
Student (Member)	Members, students and public learners	Browse catalogue, enrol / pay, learn, download quizzes, upload answers, view results, download certificates and track CEUs.
Guest (not logged in)	Website visitors	View course catalogue and details, verify a certificate by ID, register an account.

Permission matrix

Capability	Admin	Uploader	Student
Create / edit courses, workshops, materials	Yes	Own only	-
Publish content live	Yes	Per permission	-
Upload quiz documents	Yes	Own only	-
Review submissions & record results	Yes	Own only	-
Enrol, pay, learn, submit answers	-	-	Yes
Issue / revoke certificates, set CEU values	Yes	-	-
View revenue, orders & payments	Yes	-	Own orders
Manage users & roles	Yes	-	-
Download certificates / CEU statement	Yes	-	Own only
System settings (gateway, email, branding)	Yes	-	-

SECTION 5

System Workflows

These flows describe exactly how people will move through the platform, from first visit to certificate.

5.1 Student journey: enrolment to certificate

1	**Discover** Member clicks 'Courses' on jampsych.com (or visits the LMS directly) and browses the catalogue.
2	**Register / Log in** Creates an account (name, email, membership category, licence number optional) and verifies email.
3	**Enrol** Free content: instant enrolment. Paid content: checkout in JMD or USD via Ezee Payments.
4	**Payment confirmed** Order marked Paid automatically; receipt emailed; course appears in 'My Courses'.
5	**Learn** Watches lessons / joins the live Zoom session; progress % is recorded on the dashboard.
6	**Quiz** Downloads the quiz document, completes it, uploads the answer file before the due date.
7	**Review** Uploader reviews the submission and records Pass / Resubmit with an optional score and feedback.
8	**Certificate** On completion + pass, the system generates a PDF certificate with a unique ID and adds the CEUs to the member's yearly total.
9	**Proof** Member downloads the certificate or a full CEU statement for licence renewal; anyone can verify the ID online.

5.2 Content publishing flow (Uploader to Admin)

1	**Invite** Admin creates the uploader account and ticks permissions (Courses, Workshops, Quizzes, Materials).
2	**Create** Uploader adds content: title, description, files/videos, category, free or paid, CEU value proposal, draft or publish.
3	**Approve** If the uploader lacks publish permission, the item goes to Admin as 'Pending review'.
4	**Publish** Admin confirms price, currency and CEUs, then publishes. Enrolled/subscribed students are notified.
5	**Monitor** Uploader sees enrolments, submissions and results for their own content on their dashboard.

5.3 Payment flow

1	**Checkout** Student confirms the item; an order is created with status Pending.
2	**Gateway** Student is redirected to Ezee Payments to pay securely by card.
3	**Callback** Gateway returns the result to the LMS; the order becomes Completed or Failed.
4	**Access & receipt** Completed orders unlock the content instantly and send a PDF receipt.
5	**Reconcile** Admin sees every order, its status and revenue totals; refunds are recorded against the order.

SECTION 6

Dashboards & Screens

Three dashboards were designed and approved in the prototype. Below is what each will do once built.

6.1 Admin Dashboard

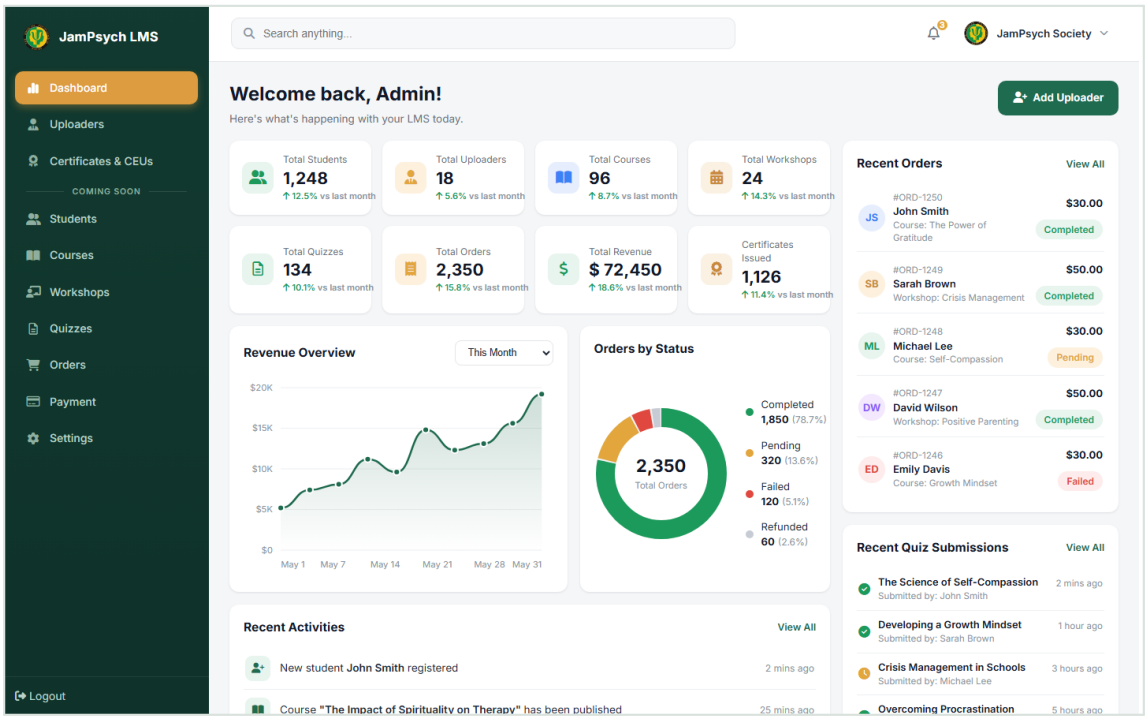

Figure 1 - Admin Dashboard (approved prototype)

Screen	Functionality
Dashboard	KPIs (students, uploaders, courses, workshops, quizzes, orders, revenue, certificates) with month-on-month change; revenue chart by period; orders-by-status chart; recent orders, activities and quiz submissions.
Uploaders	List, search, filter by status, export; add/edit uploader with profile photo, password, status and permissions; activate / deactivate.
Students	Member list, profile, enrolments, orders, CEU total, status; import existing members from CSV.
Courses / Workshops / Quizzes	Oversee all content from all uploaders; approve, publish, unpublish, set price and CEUs.
Orders & Payment	All orders with status (Completed, Pending, Failed, Refunded), filters, receipts, revenue totals, gateway settings.
Certificates & CEUs	All issued certificates filtered by uploader, course and type; view, download, revoke, re-issue.
Settings	Organisation details, logo, certificate template and signatures, email templates, currencies, licensure year start.

6.2 Uploader (Instructor) Dashboard

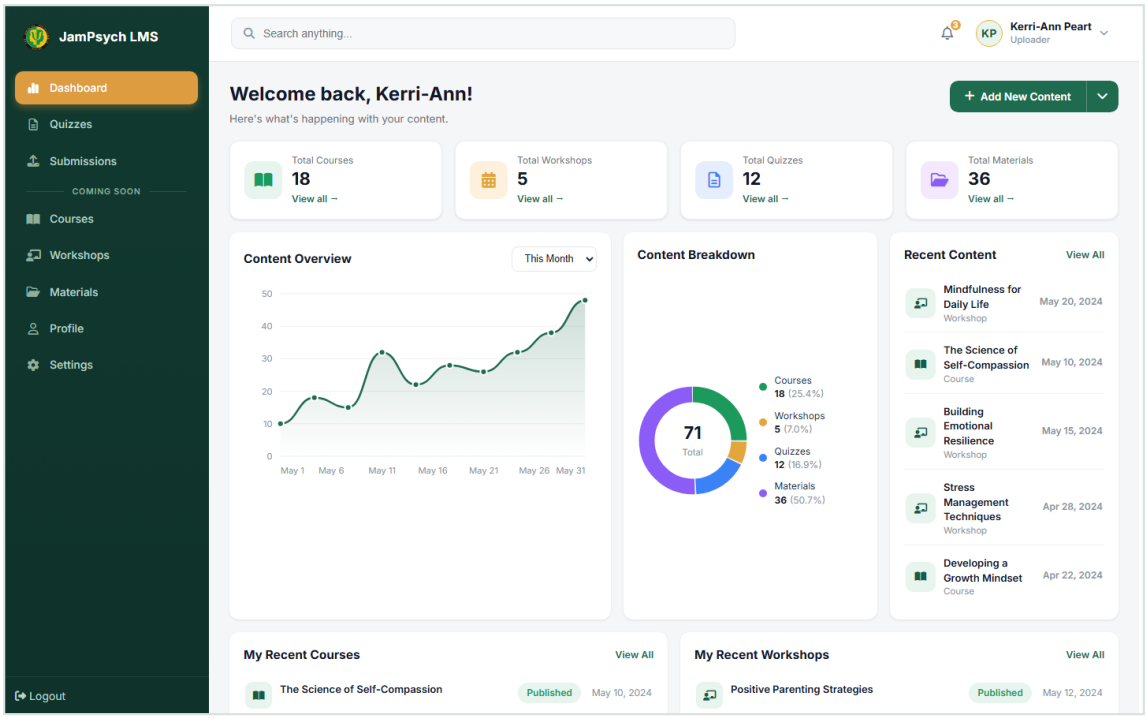

Figure 2 - Uploader Dashboard (approved prototype)

Screen	Functionality
Dashboard	Totals for courses, workshops, quizzes and materials; content-over-time chart; content breakdown; recent content, recent courses and workshops.
Add New Content	One form for Course, Workshop, Quiz or Material: title, description, file upload (PDF, DOC, DOCX, PPT, PPTX up to 50 MB), category, Free/Paid with price, Published/Draft.
Quizzes	List of own quizzes with course, file, upload date and status; upload new quiz (Word document) with course, description and status.
Submissions	All student answer files for own quizzes; filter by course, quiz, student, status (Submitted / Late); view, download, record result; export.
Courses / Workshops / Materials / Profile	Manage own content and profile (built from the same patterns).

6.3 Student (Member) Dashboard

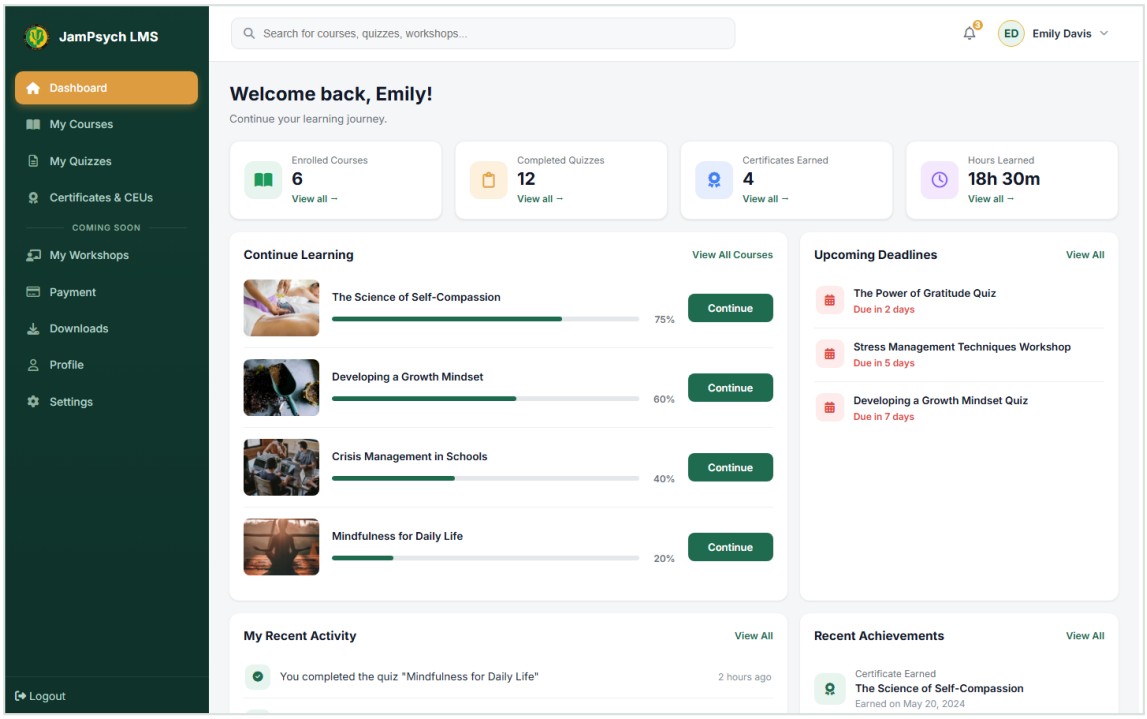

Figure 3 - Student Dashboard (approved prototype)

Screen	Functionality
Dashboard	Enrolled courses, completed quizzes, certificates earned, hours learned; Continue Learning with progress; upcoming deadlines; recent activity and achievements.
My Courses	All / In Progress / Completed tabs, progress bar, last accessed, Continue / Review / Start actions.
My Quizzes	Download quiz, upload answer, due dates; Submitted tab with file, date, status and result.
Certificates & CEUs	Every certificate with completion date, CEUs earned and certificate ID; view and download PDF; yearly CEU statement.
My Workshops, Payment, Downloads, Profile, Settings	Workshop registrations and join links, order history and receipts, downloaded materials, profile and password.

> **Note on 'Coming Soon' screens**
>
> Screens marked 'Coming Soon' in the prototype (e.g. Students, Orders, My Workshops, Payment) are included in this build. They follow the same layout, components and style as the approved screens.

SECTION 7

Functional Requirements

Each requirement has an ID so it can be referenced during testing and sign-off. Priority: **M** = Must have (launch), **S** = Should have.

Authentication & Accounts

ID	Requirement	Priority
FR-01	Register with name, email, password, phone, membership category and optional licence number.	M
FR-02	Email verification, secure login, logout, forgot / reset password.	M
FR-03	Role-based access; each role sees only its own dashboard and data.	M
FR-04	Admin can create, edit, deactivate users and reset their passwords.	M
FR-05	Import existing members from a CSV/Excel file.	S

Courses, Workshops & Materials

ID	Requirement	Priority
FR-06	Create content with title, description, cover image, category, instructor, CEU value.	M
FR-07	Lessons with video embed (YouTube/Vimeo/Zoom recording) and downloadable files.	M
FR-08	Free or paid pricing in JMD and/or USD; published or draft status.	M
FR-09	Workshops/webinars have date, time, capacity and a live-session (Zoom) link shown only to enrolled students.	M
FR-10	Track student progress (% of lessons completed) and last accessed time.	M
FR-11	Admin approval step for uploaders without publish permission.	S

Quizzes & Submissions

ID	Requirement	Priority
FR-12	Uploader attaches a quiz document (.doc/.docx) to a course with due date and question count.	M
FR-13	Student downloads the quiz and uploads an answer (PDF, DOC, DOCX, JPG/PNG, max 25 MB).	M
FR-14	Submissions after the due date are flagged Late; re-upload allowed until reviewed.	M
FR-15	Uploader views/downloads answers and records Pass / Resubmit, score and feedback.	M

CEUs & Certificates

ID	Requirement	Priority
FR-16	Certificate auto-generated as PDF when course is completed and quiz passed.	M
FR-17	Unique certificate ID (e.g. JP-2026-00012) and public verification page.	M
FR-18	CEU totals per member per licensure year, with a downloadable CEU statement.	M

ID	Requirement	Priority
FR-19	Admin can revoke or re-issue a certificate; certificate types: Completion and CEU.	M

Payments & Orders

ID	Requirement	Priority
FR-20	Checkout through Ezee Payments; order status updated automatically from the gateway.	M
FR-21	Order history for students; full order list with filters and totals for admin.	M
FR-22	PDF receipts; refunds recorded by admin with reason.	M
FR-23	Discount / member-price support (e.g. member vs non-member price).	S

Notifications & Reports

ID	Requirement	Priority
FR-24	Email + in-app notifications for enrolment, payment, new content, reminders, results and certificates.	M
FR-25	Admin dashboard KPIs and charts computed from live data.	M
FR-26	Exportable reports (CSV/Excel): revenue, enrolments, completions, CEUs issued, submissions.	M
FR-27	Activity log of key admin actions (who changed what, when).	S

SECTION 8

Non-Functional Requirements

Area	Requirement
Security	HTTPS/SSL everywhere; hashed passwords (bcrypt); CSRF and XSS protection; role-based authorisation on every request; login rate limiting; private file storage - quiz answers and certificates are never publicly listable.
Payments	No card data stored in the LMS; card entry happens on the Ezee Payments page (PCI responsibility stays with the gateway); callbacks verified by signature.
Data protection	Personal data handled in line with the Jamaica Data Protection Act, 2020: minimal data collected, access restricted by role, privacy policy and consent at registration.
Performance	Pages load in under 3 seconds on a normal connection; supports at least 500 registered users and 100 simultaneous users on the recommended hosting.
Availability & backup	Target 99.5% uptime; automated daily database and file backups kept for 30 days; restore tested before launch.
Usability	Responsive on desktop, tablet and mobile; matches approved prototype; clear error messages; accessible colour contrast and keyboard navigation.
Compatibility	Latest two versions of Chrome, Edge, Firefox and Safari (desktop and mobile).
Maintainability	Clean Laravel architecture, version-controlled code (Git), documented setup and deployment.

SECTION 9

Technology Stack & Architecture

Layer	Technology	Why
Backend framework	Laravel 12 (PHP 8.3)	Mature, secure, fast to build with; built-in auth, queues, mail, file storage.
Front end	Blade templates + existing prototype CSS/JS, Alpine.js / Livewire for interactive parts	Re-uses the approved prototype directly, so the built product looks exactly as agreed.
Database	MySQL 8	Reliable relational storage for users, orders and certificates.
Roles & permissions	Spatie Laravel-Permission	Industry-standard role/permission management.
PDF generation	DomPDF / Browsershot	Certificates, receipts and CEU statements.
Payments	Ezee Payments API (JMD/USD)	Gateway JamPsych already uses; others (e.g. PayPal/Stripe) can be added later.
Email	SMTP / transactional mail service (e.g. Mailgun, Amazon SES)	Reliable delivery of receipts and notifications.

Layer	Technology	Why
File storage	Private server storage or Amazon S3-compatible storage	Secure storage of quiz files, answers and certificates.
Background jobs	Laravel Queues + Scheduler	Reminders, certificate generation, emails without slowing the site.
Hosting	Managed VPS (e.g. DigitalOcean, Hostinger VPS) with Laravel Forge or cPanel	Full control, SSL, backups; approx. USD 12 - 25 / month.
Domain	learn.jampsych.com (sub-domain)	Keeps the WordPress site untouched; linked from its menu.

How it connects to the current website

- The WordPress site stays as the public face of JamPsych. We add a **'Member Login / Courses'** button and menu links pointing to **learn.jampsych.com**.
- Education pages on WordPress (Courses, Webinars, Workshops) can link each item to its LMS page for enrolment - replacing Google Forms.
- Branding (logo, green/gold colours) is shared so the move between the two feels seamless.

SECTION 10

Core Data Model

The main records the system will store. This is for transparency; no action is required from JamPsych.

Entity	Key information
Users	Name, email, phone, role, membership category, licence number, status, profile photo.
Uploader permissions	Which content types an uploader may create and whether they can publish.
Courses / Workshops	Title, description, type, category, instructor, price (JMD/USD), CEUs, status, schedule, capacity, Zoom link.
Lessons & Materials	Belong to a course: order, title, video URL, attached files.
Enrolments	Student + course, enrolled date, progress %, completed date, last accessed.
Quizzes	Course, file, question count, due date, status.
Submissions	Quiz + student, answer file, submitted at, late flag, result, score, feedback, reviewed by.
Orders & Payments	Student, items, amount, currency, gateway reference, status, refund details.
Certificates	Unique ID, student, course, type, CEUs, issue date, issued by, status (issued/revoked), PDF.
Notifications & Activity log	Messages sent to users; audit trail of admin actions.

SECTION 11

Project Timeline (4 - 5 Weeks)

Work is planned in weekly milestones. JamPsych will see progress on a staging link every week.

Week	Milestone	Work completed	Client review
Week 1	Foundation	Server & staging setup, Laravel project, database design, authentication, roles & permissions, layouts converted from prototype (sidebars, top bar, role switch).	Log in to staging with test accounts for each role.
Week 2	Admin & content	Admin dashboard with live data, uploader management, student management, course/workshop/material creation, uploader dashboard and Add New Content.	Create a test course; review admin screens.
Week 3	Learning & quizzes	Student dashboard, catalogue, enrolment, lessons & progress, quiz upload/download, answer submission, submissions review, notifications.	Enrol as a student and submit a quiz.
Week 4	Payments & certificates	Ezee Payments integration (JMD/USD), orders & receipts, certificate PDF generation, CEU tracking and statement, verification page, reports & exports.	Test payment in sandbox; review certificate design.
Week 5	Testing & launch	Full QA on desktop/mobile, security hardening, speed optimisation, content/member import, User Acceptance Testing, fixes, go-live on learn.jampsych.com, staff training & handover.	UAT sign-off and launch approval.

Timeline assumption

The 4-week target is achievable if content, gateway credentials and approvals are provided on time (see Section 13). Week 5 is reserved for user acceptance testing, corrections and a safe launch.

SECTION 12

Deliverables

- Fully functional JamPsych LMS deployed at **learn.jampsych.com** with SSL.
- Admin, Uploader and Student dashboards as per the approved prototype.
- Ezee Payments integration (live) with JMD and USD support.
- Branded certificate, receipt and CEU statement PDF templates.
- Email notification templates.
- Imported initial data: member list (if provided) and first set of courses/workshops.
- Complete source code in a private Git repository owned by JamPsych.
- Admin user guide (PDF) and a 1-hour recorded training session for staff.
- Server access details, deployment notes and backup configuration.

SECTION 13

What We Need from JamPsych

Item	Details	Needed by
Point of contact	One decision-maker for feedback and approvals (48-hour turnaround).	Week 1
Hosting & domain	Access to DNS for jampsych.com to create learn.jampsych.com; approval of hosting plan.	Week 1
Brand assets	High-resolution logo, any brand guidelines.	Week 1
Email	Sending address (e.g. no-reply@jampsych.com) and SMTP/mail service access.	Week 2
Content	First courses/workshops: titles, descriptions, prices, CEU values, videos/files, quizzes; list of instructors (uploaders).	Week 2
Member data	Existing member list in Excel/CSV (name, email, category) if import is required.	Week 3
Payment gateway	Ezee Payments merchant API credentials (test and live) and confirmation of currencies.	Week 3
Certificate	Certificate wording, CEU approving body statement, signatory names and signature images.	Week 3
Policies	Privacy policy, terms of use and refund policy text.	Week 4
UAT testers	2 - 3 staff/members to test and sign off.	Week 5

SECTION 14

Assumptions & Risks

Assumptions

- The approved prototype is the final design; major layout changes after Week 1 are treated as change requests.
- Ezee Payments provides an API/integration method suitable for automatic order confirmation.
- Quizzes are document-based (download / upload) as shown in the prototype.
- Hosting, domain, email service and gateway fees are paid directly by JamPsych.
- Content (text, videos, files) is supplied by JamPsych; video is hosted on YouTube/Vimeo/Zoom.

Risks & mitigation

Risk	Impact	Mitigation
Delay in gateway credentials	Payments cannot go live	Request credentials in Week 1; build and test in sandbox first.
Late content or feedback	Timeline slips	Weekly check-ins; fixed feedback windows; launch with available content.
Scope growth during build	Timeline and budget increase	Change-request process (Section 15); new items moved to Phase 2.
Low adoption by members	Manual processes continue	Simple onboarding email, how-to guide, links from the website and social media.

SECTION 15

Change Management, Support & Warranty

- **Communication:** weekly progress update and staging demo; shared tracker for feedback.
- **Change requests:** anything outside Section 3 is logged, estimated (time/cost) and approved in writing before work starts.
- **Acceptance:** each milestone is accepted when its features work as described in Section 7 on staging.
- **Warranty:** 30 days of free bug fixing after go-live for defects in delivered features.
- **Ongoing support (optional):** monthly maintenance plan covering updates, security patches, backups monitoring and small enhancements.

SECTION 16

Approval & Sign-off

By signing below, both parties agree to the scope, requirements and timeline described in this document.
